

Helping to make the Haven Gateway a special place

Anticipating major pressures in housing growth for the future, the Haven Gateway Partnership commissioned in 2007 a 20-year Green Infrastructure Strategy for the sub-region. Funding has been achieved for the first phase delivery of the strategy, and a Green Infrastructure Advisor is now needed to support the Steering Group and partners in taking the strategy forward.

Haven Gateway Green Infrastructure Advisor

Main office base, Colchester

£28,118 – £30,724 per annum pro-rata

19 hours per week, days/hours flexible and subject to agreement

Fixed-term to March 2010 with ability to extend for a further year, subject to funding

As part of the Groundwork East of England team, you will work closely with the Haven Gateway Partnership and project leads to ensure the delivery of the initial phase of projects. You will also help partners develop new schemes for future phases of delivery, identify opportunities for external funding, give support with bids and promote the importance of multi-functional green infrastructure widely across the sub-region.

Educated to degree level with potentially post-degree professional qualifications in landscape design, planning, environmental management or similar, you will have several years' experience in land use planning and design, regeneration and programme management. Accomplished at working in partnership, you will need to inspire those you deal with, solve problems creatively and negotiate successful outcomes for environmental gain.
